

Node's Operating Systems is AKS

Linux

- Ubuntu 18 
 - Default OS for AKS Linux nodes with Kubernetes version ≤ 1.24
- Ubuntu 22 
 - Default OS for AKS Linux nodes with Kubernetes version ≥ 1.25 (will be replaced by Mariner at a certain point as the default Linux OS for AKS nodes)
- AzureLinux (Mariner) 
 - Microsoft's Linux open-source distribution that will become the default Linux OS in AKS

Windows

- Windows Server 2019
 - Default OS for AKS Windows nodes with Kubernetes version ≤ 1.24
- Windows Server 2022
 - Default OS for AKS Windows nodes with Kubernetes version ≥ 1.25
 - Requires Kubernetes version ≥ 1.23
- **Considerations for Windows node pools**
 - It is mandatory to have a Linux node pool beside the Windows node pool
 - Windows node pools can be User type only and are supported only on Azure CNI clusters
